BIG FIRE.

Huge Grain Elevator, With Contents, Burned at Chicago.

Over a Million and a Quarter Bushels of Grain Destroyed.

The Loss Will Amount to Over a Million Dollars—Several Small Buildings Were Destroyed—The Armour Plant at One Time in Danger.

CHICAGO, Oct. 27.—Fire broke out on Monday in one of the two immense grain elevators of the Chicago and Pacific Co., at Cherry street and the north branch of the Chicago river. The flames soon got beyond control of the fire department, and spread to the second elevator. Over 1,350,000 bushels of grain were destroyed, and there was great danger that the lumber yards in the vicinity would also be destroyed. The Hale & Curtis Matting Co.'s building ignited from the heat of the burning elevators, but the fire was extinguished after hard fighting.

The fire started in the engine-room of the first elevator and within 15 minutes the building was a mass of flames. Several alarms in quick succession were turned in, but all efforts to save the elevators were unavailing and the department turned its attention to protecting adjoining property.

At 9 o'clock the property loss was estimated to have reached one million dollars and the fire was still beyond control.

The elevator "A" was a private warehouse with 600,000 bushels capacity. The other, "Pacific B," with 1,000,000 bushels capacity, was a regular warehouse and holds over 900,000 bushels of wheat and some corn and oats. The locality is as dangerous as could be desired for a big fire. The two Pacific elevators, "A" and "B," were filled with wheat, and of themselves would furnish material for a goodly conflagration.

Directly to the north is the Armour elevators, the largest in the world, stocked up to the roof with grain. To the northwest is the immense stock yard of Hale & Curtis, while within gunshot lie the coal shed and dock of the Crescent Coal Co., stock piled in thousands of tons of bituminous coal. Lumber yards in the immediate vicinity offer further material for the spread of the blaze, in addition to which there are a number of frame cottages scattered around.

At 2:15 p. m. the fire spread to several small frame buildings owned by the Chicago, Milwaukee and St. Paul railway, which were destroyed. When the walls of the elevators were reached the roof was caught by a gust of wind and blown outward. Twenty firemen were working directly under it and were ordered back just in time to escape the burning roof, which fell within a few feet of them.

MASSACHUSETTS.

A Trial Trip Proves That the New United States Battleship Is No Superior.

WINTHROP, Oct. 27.—The new United States battleship Massachusetts, just returned from her final trial trip, has no superior in the navy. Her performance on trial has exceeded that of the Indiana. The report of the inspection board, of which Com. Dewey was chairman, and which ran for 48 hours at sea last week, reached the navy department Monday. On October 12 she ran 12 hours by the log for 100 miles, making an average of a little more than 101 revolutions, developing 5,944 horse power. During the succeeding 48 hours of the trial, all guns were fired on the level and at maximum elevation with service charges, the structure of the ship and gun mounts showed no undue strain, and freedom from any injury or strains.

The board found that upon the trial no weakness or defect appeared in the hull, machinery, fittings or equipment due to defective workmanship or material.

FIGHTING IN CUBA.

Several Engagements in Which the Spanish Forces Claim the Insurgents Lost Was Heavy.

HAVANA, Oct. 27.—Col. Segura has reported to the government that his command surprised a body of rebels at Garganta Sorro, province of Pinar del Rio, and that in the fighting that followed four of our insurgents were killed. The Spanish by this victory gained possession of a route to the hills and build up a position to defend their position. While employed in this work the troops were continually fired upon by rebels, but no losses were sustained. On October 24, Col. Segura left the main body of his command and with a small force started to reconnoiter the country. On his way back he learned that the Semore battalion was engaged with the rebels. He therefore hurried to the scene of the fighting and took part in the combat.

The rebels made desperate efforts to carry the Spanish position and thus open a route to the hills, but were compelled to retreat closely followed by the Spaniards. A number of bloodless fights occurred during the two days of the pursuit. The rebels left 10 dead on the field, but it is believed that the Spaniards lost more than this. The troops lost a lieutenant and 21 privates killed and 110 wounded, including four captains and two lieutenants.

PICADOR KILLED.

A Bull Fight at Nogales, Mexico, With Fatal Results.

NOGALES, Ariz., Oct. 27.—A bull fight with fatal results occurred at Nogales, Sonora, Mexico, and the result time caused a panic in the audience. One of the bulls became more enraged than usual at these rather tame fights, ranled about the arena, goring everything within its reach. A horse was disemboweled, a picador, Jose Angulo, in an attempt to place a thorn on the side of the wild animal, was caught on one of its long horns which pierced him like a sword. He was thrown and fell to the ground, bleeding and mangled, where the beast held him between his horns and pained him. He was frightfully injured and died in a few minutes. Intense excitement reigned in the audience and at one time it was on the verge of a panic but was quieted by the killing of the bull.

ATTEMPT TO ASSASSINATE

The Legion Tenets of the Armenian Patriarch in the Streets of Constantinople.

CONSTANTINOPLE, Oct. 27.—While Mr. Bartolomeo, who on August 9 last was selected as the Armenian patriarch, was driving through the streets of the city, he was attacked by four men who attempted to murder him. The escort accompanying Mr. Bartolomeo seized the would-be assassins and the police. An examination elicited the fact that one of the prisoners was an Armenian priest.

Mr. Bartolomeo has excited the hostility of the Armenians by his adherence to the sultan and the attempt to suppress the Armenian due to this feeling. He is highly esteemed by the Turks for his Mohammedan sympathies.

PUBLIC HEALTH.

Annual Report Issued by the Marine Hospital Service.

Danger of Importing Yellow Fever Through a New Agency.

Cuba Establishing Hospitals in Sugar Warehouses—The Measures Will Infect Those Buildings and Much Sugar May Be Lost in Them.

WASHINGTON, Oct. 27.—The public health report, issued by the marine hospital service, brings to attention of the authorities the danger of importing yellow fever from Cuba through a new and hitherto untried agency. Dr. D. M. Burgess, sanitary inspector at Havana, writes to Surgeon General Wyman under date of October 17.

"I am informed that the government here has appropriated and is already using for hospital purposes the extensive warehouses, or sugar store houses of Regia, which structure it will be remembered are situated contiguous to the wharf on the opposite side of the harbor from this city. This measure, of course, will infect those buildings and probably much sugar may be stored in them.

Dr. Burgess says: "Yellow fever does not exist to any great extent among civilians in this city, which circumstance is probably owing to the fact that but few of such persons have come here during the past year who are liable to it. But that disease continues with all its malignancy and perhaps increasing numbers among the Spanish soldiers. The statistics of the many hospitals in the neighborhood of Havana, that is to say, within a radius of 25 miles or so, can not at present be obtained, if ever.

"Sixty-one of the 65 deaths from yellow fever during the week were among Spanish soldiers in the military hospitals, while the remaining four deaths from that disease were among civilians in the city.

"Smallpox is now limited almost entirely to civilians as the Spanish troops are now supposed to be vaccinated either before leaving Spain or on their way here.

"All the deaths from smallpox were among the civilians in poor circumstances."

ENGLAND'S TREATMENT

Of Irish Political Prisoners Vigorously Indemnified.

PHILADELPHIA, Oct. 27.—Vigorous condemnation of England's treatment of Irish political prisoners was expressed at a mass meeting in the academy of music Monday night and the alleged inhumanities practiced upon Dr. Thomas Gallagher, Albert White and their associates recently released from British dungeons, were resented in forcible speeches and resolutions.

For the time all differences between the Irish religious factions were forgotten. Hilbertians and Orangemen united in one protest. While the demonstration was characteristically Irish and for the sake of Ireland's sufferers, one outstanding feature was the presence of Ex-Gov. Robert F. Patterson presided at the meeting and speeches in condemnation of the English panel system were made by Babu Joseph Kramphoff, of the Keneseth Israel temple; A. K. McClure, editor of the Philadelphia Times, and ex-Congressman Willis McCallister.

Almost every man in America has some digestive trouble. When you meet the greeting usually is, "Well, how are you?" That develops health talk. The man who has no bowel or stomach trouble is almost a curiosity. Trouble is men take no care of themselves. They eat as though they ate copper stomachs and bowls of brass. By and by overworked nature rebels. Then come headaches, nervousness, bad blood, liver and kidney troubles. Dr. Pierce's Pleasant Pellets furnish help for constipation and torpid liver, sick and bilious heads, dizziness, sour stomach, loss of appetite, indigestion or dyspepsia, windy belching, "heartburn," pain and distress after eating and kindred derangements of the liver, stomach and bowels. ANNUAL REPORT

Of Commodore Sampson, of the Naval Ordnance Bureau.

Over Nine Million Dollars Required for the Next Fiscal Year.

Seven Millions of This Required for the Ammunition of New Vessels and the Shorted-Ten Thousand of the New Steam-Tugs Have Been Ordered.

WASHINGTON, Oct. 27.—The naval ordnance bureau requires over \$9,000,000 next year, of which \$7,000,000 is needed for the ammunition of new vessels already authorized. The annual report of Com. Sampson, chief of ordnance, shows 71 big breech loading guns have been completed this year, and that more than half of the required smaller guns are now in use. The difficulty of securing a proper breech priming powder is shown by the fact that while 699,847 pounds were accepted last year, \$53,700 were rejected. Efforts have therefore been increased to perfect smokeless powder manufacture. The contractors have delivered over 8,000 tons of plates up to October 1, of which 1,075 tons were Harveyized. The average cost per ton which in 1895 was \$611.20 was this year \$451.73. Notice is taken of the first foreign orders for armor ever placed in this country. Russia having contracted with the Carnegie and Bethlehem works for 1,000 and 3,000 tons respectively. In referring to the delivery of the new small arm, of which 10,000 have been ordered, the very small calibre of which has been criticised, Commodore Sampson declares "that at the present moment no nation having any pretensions to military or naval power has in contemplation any other change in the caliber of its small arms than a still further reduction."

The navy now has 112 Whitehead torpedoes in use, 186 more being held in reserve for new ships and torpedo boats. All the six-inch rifles in the service are being changed to rapid fire weapons. In instanting the remarkable promptness with which vessels on the home station can have their explosive stores replenished, it is said that the Sillitoe off Newport one morning and delivered 6,000 pounds of smokeless powder to Fort Wadsworth, N. Y., and South Amherst, N. J., within twelve hours. The bureau has ordered 1,000,000 rounds of ammunition for the new small arm.

MILLIONS OF ACRES

Of Land Involved in a Suit Now Pending in the United States Supreme Court. WASHINGTON, Oct. 27.—The title to 40,000,000 acres of land is involved in a case pending in the supreme court of the United States. wherein the United States Monday asked leave to file a brief, because of its concern in the question presented. The title of the case is the Atlantic & Pacific Railroad Co. vs. Robert Mingo, and it came from the supreme court of the territory of New Mexico. The litigation was over the title to a tract of land situated within the limits of that part of the grant originally made in 1850 to the Atlantic and Pacific Railroad Co., and declared to be forfeited to the United States by the act of 1858, because the road company, terminating therewith had not been constituted in accordance with the conditions of the grant. The supreme court of the territory affirmed Mingo's title to the land, and the railroad company appealed to the supreme court of the United States.

It is claimed by the railroad that by an act passed in 1871 congress, expressly authorized the company to mortgage the land grant and that, having been done, congress could not forfeit the land at least until after the time when that mortgage became due which time had not yet arrived.

Mr. Joseph Call, assistant counsel for the United States, in his brief states that the land in question comprises that part of the grant lying between latea Junction and Springfield, Mo., and between the Colorado and the Pacific ocean, forty out of the fifty millions of acres contained in the original grant. If the terms of the railroad company should be sustained all of the patents issued by the United States and entries allowed to settlers for colored land and since 1880 would be nullified. He contends that the contract must be upheld and the judgment of the territorial court in favor of Mingo's title affirmed.

He Accepted the Bet.

St. PAUL, Minn., Oct. 27.—Michael Doran, a stock broker of this city, who a few days ago put a standing order in the local papers of this city that he would bet any part of \$100,000 that McKinley would carry Minnesota, received a letter from J. M. Kehoe, a grocery merchant of Jeffersonville, Ind., stating that he wished to bet \$10,000 that Bryan would carry Minnesota. \$20,000 Bryan was elected, and \$2,000 that he would win both bets. Mr. Doran was as follows: "I accept your proposition, and you can double it as many times as you wish."

Spain is Not Without Resources. MADRID, Oct. 27.—An official note issued Monday denies the reports that Spain is without resources to continue the war in Cuba. It points out that the rejection by the Spanish government of the conditions sought by the United States for the loan imposed by French financiers for taking up the proposed loan is proof that Spain is able to obtain the necessary funds. Negotiations for the loan, the note adds, are proceeding elsewhere.
